EXPERIENCE

Match Group, Dallas, TX – Software Developer

09.2019 – Present

Currently a junior software developer on Match.com's CoreWeb team, which primarily develops UI for Desktop and Mobile Web on the flagship Match site. My primary responsibilities on the team are helping develop, maintain, and test features for Match's Latin American sites such as ParPerfeito in Brazil and Match Mexico and Argentina.

DevMountain, Dallas, TX – Mentor

06.2019 – 09.2019

Responsible for mentoring, guiding, and educating students through their 13 weeks in the immersive web development course at DevMountain.

PROJECTS

Pokedex – pokedex-jh.netlify.com/

A personal Pokedex

- Technologies used: React, Typescript, Tailwind CSS, Apollo, GraphQL
- Solo project created to learn and develop with newer frontend technologies

TapeDeck – tapedeck.site

A file management and versioning app for creatives

- Technologies used: React, Redux, Sass, Material-UI, Node, Express, bcrypt, PostgreSQL, AWS S3
- **Won best overall project at DevMountain**
- Individual project completed in two weeks
- Achieving versioning functionality proved challenging but greatly strengthened understanding of back-end and was very rewarding
